In the late 1800's, Charles Evans started a bibliography of everything published in the United States between 1639 and 1830. He didn't quite accomplish his goal but he came close. The Hekman Library has microform copies of over 36,000 items identified by Evans, and now online as well (NOTE that you will be able to link to all 36,000

titles through WebCat by November 2004). The Evans collection has served as a foundation set for research involving early American history, literature, philosophy, and religion. It is the definitive resource for information about every aspect of life in 17th- and 18th-century America, from agriculture and auctions through foreign affairs, diplomacy, literature, music, religion, the Revolutionary War, temperance, witchcraft, and just about any other topic imaginable. The Hekman Library recently purchased the Series 2, Shaw-Shoemaker, which will become available online starting in 2005.
