Information Hunting Made Smarter

Until recently, people tracking down titles in the catalog had their choice of just two weapons; a basic search *bomb* or an advanced search *sniper rifle*.

Both work fine for certain targets, but not everyone wants to sort through rubble or bother with highly-skilled sharpshooting. Well, the same technology advances which gave us the heat-seeking missile have now added another tool to our arsenal, SmartSearch.

As a basic search with relevance ranking, you can now achieve maximum results with minimum fuss. Fire away!

"...let us save what remains: not by vaults and locks which fence them from the public eye and use in consigning them to the waste of time, but by such a multiplication of copies, as shall place them beyond the reach of accident."

Thomas Jefferson to Ebenezer Hazard, February 18, 1791.
